

THE  
HONEYCOMB

Mesh Integration  
Aftercare guide.

## BRUSHING YOUR HAIR

- Starting at the midlengths of your hair, hold each section for support just above where you are brushing and brush downwards towards the ends. Continue this process and brush sections higher up the hair shaft each time. When close to the roots, brush one side of your system at a time, using your other hand to support the top of the hair piece, repeat on the other side.
- Never brush the hair when it is wet and only use a wide tooth comb to ensure the hair does not stretch and weaken

# SUN/SUNBEDS

UV rays can fade or discolour extensions – we advise wearing a hat while out in the sun and if you use a sunbed to wrap the hair up in a towel and completely keep out of exposure to strong UV rays.

# SPORTS/GYM

Detangle your hair using a teezer brush and tie up using slinky bobbles

# WASHING Your hair!

Before washing, always brush your hair to avoid problems with tangles and matting.

## Shampooing

- Gently push the shampoo through the base of the unit, this will help clean your scalp below.
- Shampoo your own hair below the system as normal
- Gently rub the shampoo into your hair addition.

## Conditioning

- Apply your recommended conditioner to wet hair.
- Using gentle finger strokes, smooth conditioner from mid-lengths to ends.
- Rinse thoroughly

## Hair Masks

- For extra conditioning, regularly apply a mask to the hair.
- After washing, apply a recommended hair mask.
- Smooth through midlengths to ends. Leave for ten minutes, rinse thoroughly

## Leave in conditioner

- Spray a leave in conditioner onto wet hair before drying every time for extra longevity from your hair system.

# PRODUCT recommendations

We recommend using products that aimed towards repair or moisture.

Your stylist will recommend a hair care regime best suited to your hair, based on colour, condition and how often you style your hair.

## MUST HAVE PRODUCTS

- Shampoo (Repair or Moisture based)
- Conditioner (Repair or Moisture based)
- Hair Mask (Repair or Moisture Based)
- Heat Protection
- Leave in Spray.
- Hair Extension/Wig Brush

 **FRAMAMAR™**

We recommend using the Framamar, Detangle brush for hair extensions & wigs! It's also great for every day use on normal hair!

- Effortlessly detangles even the most stubborn knots
- Ideal for all hair types

Colours may vary!

# DAILY Maintenance

Your unit will need very little daily maintenance other than brushing. You can treat it just like your own hair, but do remember to apply heat protection when heat styling.

# MAINTENANCE

- As your hair grows, the unit will begin to wobble, this is completely normal as your hair is growing underneath. This should still lay flat but move when you style and brush.
- This means you'll need to pay your specialist a visit for a regular maintenance, we recommend every 6-8 weeks.
- Your stylist will remove the system, clean and refit

# WEARING Your hair up!

You can wear your hair up while wearing a hair system, however the way you wear it up may need to change. It's not recommended to wear the system up in a high bun or high pony as this can loosen the hair piece and it could be visible.

Try wearing your hair in a low or mid pony tail.

## COLOURING

- We do not recommend colouring your hair system yourself.
- Colouring should be carried out by a qualified professional
- We do not recommend perming, or lightening hair systems, this will shorten the life span of your system drastically.

## SLEEPING

- Whilst sleeping, we recommend wearing your hair in a loose pony tail or plait. This will help avoid any matting.
- Using a silk or satin pillow case will help reduce tangles and improve the life span of your hair system.
